

MOUNIKA DEVAVARAPU

Full Stack Developer | AI & LLM Enthusiast

[LinkedIn-monidevavarapu](#)

Contact no: 6302830566

monikadevavarapu@gmail.com

Portfolio: <https://monika200417.github.io/portfolio/index.html>

TECHNICAL SKILLS

- Languages: Python, C#, SQL, JavaScript
- Frameworks & Libraries: React, Django
- AI & LLM: Prompt Engineering, RAG Concepts, LLM Basics
- Databases: MySQL, MongoDB
- Tools & Technologies: Git, GitHub, Postman, REST APIs
- Cloud: AWS(EC2, S3), Amazon VPC, Google Cloud(basics)

PROJECTS

KaushalHub- Skill Development & Collaboration Platform

- Developed a full-stack platform enabling users to discover skills, projects, and collaboration opportunities
- Designed and implemented IWT for authentication, role-based access, and project/resource management
- Structured backend logic for scalable user and project workflows, improving maintainability and extensibility.

PDFGenie (AI-Powered Document QA System)

- Built a PDF-based question answering system using text extraction, chunking, and semantic similarity retrieval
- Designed a retrieval pipeline to fetch relevant document sections for accurate responses
- Developed a React frontend and Node.js backend for seamless PDF upload and querying
- Optimized text preprocessing and retrieval flow to improve answer relevance

Currently enhancing the system with LLM integration and Retrieval-Augmented Generation(RAG) for context-aware responses

Airline Booking System (Python, Django)

- Developed a web application for flight search, booking, and reservation management using Django
- Designed and implemented RESTful backend logic for handling user requests and booking workflows
- Built dynamic UI components and ensured smooth data flow between frontend and backend

INTERSHIPS & EXPERIENCE

MERN Stack Intern (NASSCOM / SmartInternz)

- Built and tested full-stack application features using MongoDB, Express, React, and Node.js
- Worked on debugging, API integration, and improving application performance
- Followed Agile-based development with sprint tasks and version control using Git Python Intern (TechnoHacks)
- Developed Python-based programs focusing on problem-solving and logic building
- Wrote clean, modular code and basic documentation for maintainability

Google Cloud Generative AI Virtual Intern (SmartBridge)

- Learned fundamentals of cloud computing and Generative AI concepts
- Explored cloud-based deployment and AI application workflows

AWS and Entrepreneurship Trainer in JNTU college

- Trained students for a week on concepts AWS and Entrepreneurship and earned 5250/-

CODING PRACTICE & ACHIEVEMENTS

- Achieved 3rd place in an ideathon and awarded with 5000/- for KaushalHub project in Andhra University
- Solved 160+ DSA problems (Python, C#, SQL) on LeetCode & HackerRank; 4★ Python badge.

EDUCATION

Batchelor of Technology in Information technology , Andhra University - CGPA : 8.36/10

2022-2026

PROFESSIONAL TRAITS

- Effective communication skills with experience explaining technical concepts clearly in my hackathons, presentations in college as a Class Representative for 4 years and as an AWS Trainer in another college.
- Keen interest in AI tools, LLMs, and evolving software development practices.
